A NEW WAY OF THINKING **A NEW WAY OF DOING**

If we think differently, we act differently, in a way that simplifies the lives of people and improves the work of professionals, creating skills and investing in research generating global solutions.

We help our end customers by providing them with safe, efficient and convenient

solutions to improve the quality of their living spaces, whether private or public.

We do this thanks to the know-how and expertise of our global network; we are a global benchmark for automation, smart homes, access control and security, and parking systems.

VIS ION

We believe in a world where sustainable technological innovation makes people's lives more comfortable, simple and secure

MIS SION

To create a global offer of high-quality technological products and solutions for automation, smart homes, access control and security to improve our customers lives and our partners business

FOREVER INNOVATORS

For over 50 years, we at CAME have designed and produced high-quality technological products and solutions for the comfort and security of people in residential, public and business environments.

Thanks to the trust of our customers, we have become a go-to brand and global partner for automation, smart homes, access control and security, and parking systems.

We have capitalised on our experience and built quality relationships with many professionals, who have become ambassadors of CAME's values, bringing cutting edge technology into the lives of our customers around the world.

Our innovations translated into solutions for people become strategic for defining the scenarios of planning and living the future.

THREE SETTINGS INFINITE SOLUTIONS

Our continued growth has enabled us to expand our product lines and the range of options we offer our partners and customers. Through our high-quality, customizable solutions, we transform residential, public, and urban environments into smart spaces.

RESIDENTIAL BUSINESS URBAN

AUTOMATION

Our market experience enables us to provide a complete, state-of-the-art range of automation for gates, garage doors, industrial sectional doors and automatic barriers. The Connect technology fitted into these operators lets you manage all features in remote mode. This is quite an advantage for both end users and installers, who can provide assistance also remotely.

Safety, design and innovation are the hallmark of all our products, which are designed to be integrated into any type of building.

AUTOMATION SOLUTIONS FOR SWING AND SLIDING GATES

CAME's wide range of automation solutions makes it possible to make all types of entrances smart and secure, while ensuring maximum reliability at all times.

AUTOMATIC BARRIERS

CAME barriers for vehicle access control can be used in residential, industrial and urban contexts. Thanks to Made in Italy quality and constant investment in research and development, our barriers offer a high level of performance to ensure maximum efficiency of service in all contexts, including intensive use.

GARAGE DOORS AND INDUSTRIAL CLOSURES

Our highest aesthetic, technological and quality standards make it possible to integrate garage doors and industrial sectional doors with the most modern residential architecture.

SMART HOME

Today homes are increasingly connected to people, their needs and lifestyles. Smart technologies are capable of automating a number of activities in order to provide greater comfort and convenience. QBE by CAME is the wireless solution that interacts with awnings, shutters, lights, home climate control, and all home automation devices.

All these devices can be managed remotely, directly on smartphones and tablets or by voice commands, thus creating a true home automation system for an increasingly smart home.

VIDEO ENTRY SYSTEMS

Our range of video entry systems features an exclusive design and an innovative technology, combining advanced performance with the maximum ease of installation and use. We offer a wide range of entry panels, video and audio receivers designed to meet every need and offer advanced features, such as the ability to answer the door calls directly from your smartphone even when you are away from home.

CLIMATE CONTROL

We offer a broad range of thermostats and chronothermostats that are suited for any type of installation thanks to their reliability, user-friendliness and design, to offer maximum convenience and save energy.

AWNINGS AND SHUTTERS

We have devised a wide range of automation solutions for awnings, shutters and blinds, all cutting-edge and ideal for residential, business and industrial settings.

ACCESS CONTROL

Our experience, competency, and innovation drive us to provide world-class, cutting-edge solutions for controlling busy access points, exposition and urban venues. We offer access control solutions with a sophisticated design, but above all open to the integration with third-party technologies.

SPEED GATES

The compact design and fast opening speed make speed gates the ideal solution for settings where the flow of people is high and security must be provided efficiently. They are used in crowded places such as train stations, airports, shopping malls and entertainment venues and can be integrated with biometric recognition systems, smart cards or QR codes, providing an additional level of security.

FULL-HEIGHT TURNSTILES

Full-height turnstiles are the ideal solution to ensure pedestrian access control and maximum security for the places and people inside them. They are suitable for facilities such as stadiums, airports, stations, sports facilities or governmental offices.

ACCESS CONTROL SYSTEMS

CAME offers solutions for the management of both pedestrian and vehicle access points combining ease and versatility of use. These flexible systems make it possible to control both a single gateway and a multiaccess system, ensuring that up to 10,000 users can be managed at each site.

SECURITY

Our innovations aim to redefine urban mobility with high-tech solutions, designed for the security of sensitive areas and the control of restricted traffic zones.

Managing sustainable mobility and urban traffic control are issues that concern us all. Since the first bollard was invented, we have striven to make urban spaces safe and smart, transforming them into reliable and safe places.

BOLLARDS

Automatic bollards are used to prevent vehicles from parking in private areas or in areas where parking is not allowed or to prevent access to restricted traffic zones. They can also be used to provide security in places at risk of break-ins by ram vehicles. CAME's offerings include various types of bollards depending on the use and the level of protection required.

ROAD BLOCKERS

CAME road blockers are hydraulic devices made of high-strength steel, which are also available in a lowprofile version to limit the depth of the underground installation space and facilitate installation even in the presence of cables and pipes. The number of our international certifications received after brilliantly passing rigorous crash tests testify to CAME's commitment to security.

DEDICATED SOFTWARE

CAME software, with open protocols such as Modbus, ONVIF, Web Service, is perfectly integrated with the most modern technologies for intelligent city management.

PARKING SYSTEMS

Our decades-old experience allows us to offer cuttingedge, high-tech solutions for controlling urban spaces and parking facilities in public areas according to the principles and needs of any Smart City. CAME anticipates customer needs, responding with innovative software solutions and a wide range of offstreet products and services.

We challenge ourselves every day with the quality of our solutions to simplify and increase the efficiency of parking facilities by improving profitability, control and performance.

ZERO KM SERVICE

Zero KM Service, the new service concept for parkings, is a revolution in the world of parking, improving the performance of systems, guaranteeing the operator full autonomy in the maintenance service.

DEDICATED SOFTWARE

Lince is CAME's universal parking management software. It is flexible and highly customisable and combines all the functions of parking management, monitoring and payment services, including integration with products and services offered by third parties.

TRAINING THAT MAKES A DIFFERENCE.

TRAINING LAB

Professionals have a tough job, which always requires upgrading and updating.

Technical and product developments are not the only issues; the keys to success are a deep regulations knowledge and a strong relationship with customers, that are always more demanding for efficient services.

TRAINING LAB is the online platform dedicated to all professionals who would like to keep up-to-date with new CAME technologies in a simple and convenient way.

It is designed to enhance the experience of CAME technicians around the world and is available in several languages.

A unique tool to enhance professional skills, always available through in-person courses, online webinars and e-learning programs.

Sign up and see the list of available courses:
<https://traininglab.came.com/global>

A TEAM OF PROS

CAME offers to installers its own team of trainers, composed by technicians specialized in each product lines. All the trainers are internal staff members with great know-how and experience on projects, sales and technical issues. Each course provides the attending professionals with all is necessary for their job, so they can stay abreast of the latest market developments.

CONNECT is the CAME technology that allows to manage operators that improve the quality of life. The operators connected over the Internet offer added value for the user and open up new horizons for the installer's business.

Presented in 2015 and used by thousands of installers worldwide, CONNECT is now even more practical, more performing and more secure.

CAME has chosen to develop internally the technologies necessary to manage data flow and protection. No external agency processes the information, no server is located in remote locations around the world.

An innovative technological heart, to ensure high security and reliability. CAME has invested in research and development with the aim of simplifying the installer's work, improving user experience and offering new digital services.

All products marked by the new blue icon use CONNECT technology. They are designed for local and remote digital control and make all advanced services available through the Internet connection.

CONNECT TO THE INSTALLER'S SERVICE

Connected operators can be managed remotely via PC or smartphone. The CONNECT platform enables automatic programming via QR code of the radio controls, their remote insertion or deletion, without having to be near the operator. A portal is also available for the management of customers and installed systems and scheduled maintenance, for monitoring the status of devices with receipt of notifications in real time.

CONNECT allows the installer to offer a complete 24/7 service becoming the trusted partner for his customer.

CONNECT TO THE ADMINISTRATOR SERVICE

Essential for the condominium administrator, building manager or the system owner, the CONNECT platform allows to enable the accesses and program the remote controls.

The system administrator can also monitor the operator status and receive notifications in the event of malfunctions, if any.

It can send on-site service requests to the installer or enable remote diagnosis.

CONNECT TO CUSTOMER SERVICE

Through the free Apps that can be installed on any Android or iOS smartphone, the user can control the devices remotely. The App Automation allows to control all connected operations with a single smartphone, through simple and intuitive commands.

Thanks to the geolocation function, it also allows to set the automatic opening and closing, based on a customizable proximity radius.

SMARTPHONE APPS
CAME Automation

HOW CONNECT WORKS

To enable CONNECT services, each automation must be equipped with a GATEWAY or SLAVE module for radio connection.

Besides the plug-in GATEWAYS that use Wi-Fi technology, CAME also offers a practical GSM GATEWAY which guarantees the most complete autonomy of operation thanks to the mobile phone connection.

CAME KEY FOR AN EVEN SIMPLER INSTALLATION

CAME KEY is the new working tool designed to streamline installation, programming and management of automated operators.

By exploiting the WiFi communication between CAME KEY and smartphones, the device serves as an interface between the control board and the CONNECT SetUp APP, allowing you to access the control panel functions to adjust the system's parameters.

CAME KEY reduces job times when operators are installed in hard-to-get places, and, allows installers to do the all of the following:

- Update firmware on the control board for new features.
- Manage all operator parameters, which are organized by type.
- Check maneuvers for scheduled maintenance.
- Duplicate radio-frequency controls via QR code.

CAME KEY is compatible with all products marked with this symbol:

Download the CONNECT SetUp app from:

**WI-FI INTERFACE

THE BENEFITS

- Compatible with all control boards that are CAME Connect compatible.
- Guided set up for quick and simple commissioning.
- Backup settings to the CAME Connect cloud.
- Auto-detection of the control board.
- Settings and operators are organized by customer.
- Easy settings, thanks to the app's clear, intuitive graphical interface.

APP SETUP PRO

ALL FROM YOUR SMARTPHONE. DESIGNED FOR INSTALLERS.

APP SETUP PRO

is the dedicated app for professionals to easily manage CAME automations and video-entry systems.

A platform that revolutionizes the installer's work by simplifying automation and customer management.

With an intuitive interface, it enables the configuration of automations, accessories and video-entry systems from smartphones.

It is used locally with CAME Key or remotely via CONNECT gateway.

With SetUp Pro, the installer has one comprehensive tool for installing, maintaining, and upgrading CAME systems for both automations and video-entry systems.

Efficiency, convenience and speed in your daily work!

APP SETUP PRO

QUICK INSTALLATION

Now with an intuitive interface and simplified flow, it offers the Quick Setup function for easy configurations on CAME automations and video-entry systems via smartphone.

SIMPLIFIED LOCAL PROGRAMMING WITH CAME KEY

Thanks to the immediate connection via CAME KEY, configuration and updating of system parameters is quick and easy without complications.

CUSTOMER MANAGEMENT AND PERSONALIZED ASSISTANCE

The SetUp Pro app has a built-in customer address book allowing for quick and organized management of installations and interventions.

ALL WITHIN REACH

Maintenance and support always accessible with SetUp Pro: error history, maneuver details and quick access to spare parts, manuals and technical support.

ACCESSORY MANAGEMENT AND ADVANCED DIAGNOSTICS

The App manages accessories with advanced diagnostics, monitoring the status and reporting errors for preventive maintenance and quick troubleshooting.

FIRMWARE UPGRADE AND PARAMETER RESET

New firmware upgrades are easily uploaded via CAME KEY, which also enables rapid restoration of saved parameters, reducing time and effort.

CAME FOR ENERGY EFFICIENCY

CAME TECHNOLOGY ENHANCES THE WAY WE USE ENERGY

OUR PRODUCTS ARE DESIGNED TO MEET
NEW ENERGY CONSUMPTION REGULATIONS.

CAME automations, control panels, and accessories have been designed to meet the latest energy efficiency standards, contributing to more conscious consumption management.

CAME products that comply with the regulation requirements are identified by the **Green Power** logo, a sign that the technology you choose is also the right one for the future.

CAME, building a sustainable future.

EN 12453 European Standards

Standards EN 12453 specify the compliance and safety requirements for automatic closing systems that could come in contact with people. They define all of the technical solutions for securing users' systems.

THE SYSTEM CAN BE

- **IN PRIVATE AREA (fenced off)**
- **IN A PUBLIC AREA** or bordering with a public area despite being in a private area.

USERS CAN BE

- **TRAINED**
Users are trained when they are instructed on how to use the operator. Trained users typically work operators fitted on private property.
- **UNTRAINED**

THE COMMAND CAN BE

- **HOLD-TO-RUN CONTROL** (maintained action – man present).
The operator is activated only thanks to automatically resetting buttons or selectors (for example, to activate an operator, you press a button. When the button is released, the operator stops). The operator is in full view of the user.
- **IMPULSE ACTIVATION WITHIN SIGHT OF THE SLIDING GATE.**
The command must be impulse-type and sent from a fixed position from the system can be controlled. The button needn't be self-locking, that is, without automatically resetting button or selector.
- **IMPULSE ACTIVATION OUT OF SIGHT OF THE SLIDING GATE**
Each impulse corresponds to a function (open, close, stop, etc.).
- **AUTOMATIC** (impulses).
Each impulse sent corresponds to a maneuver cycle and not to a single function (open, close).

SLIDING GATES RIGHT OR LEFT OPENING

All CAME sliding gate automations are designed to be installed on either the right or left side of the gate.

CAME 

PAIRED OPENING

CAME's range of sliding gates lets you install two counterposed gearmotors.

INDUSTRIAL APPLICATION

In industrial facilities, where tractor trailers, 18-wheel trucks and forklifts pass through, it is always advisable to fit double-height, infrared beam photocells, to prevent the gate from closing if one of the vehicles stops at the entry/exit point.

THE FLASHING LIGHT FOR MOVEMENT SIGNALING.

CAME has always suggested installing the flashing light as an additional safety feature for the automation system.

The KRX range, with LED technology, combines energy saving and great reliability with easy installation.

KRX can be integrated with all CAME radio systems, is available in various colors, has a built-in radio antenna and each model can be powered from 24 V DC to 230 V AC.

WE CONNECT, YOU CONTROL.

The Cloud connection overhauls the way we process information. This technology revolutionizes lifestyles by ensuring comfort and security. We have put all our CAME Connect products online. In this way we can control them from any smartphone or tablet. Download the CAME AUTOMATION APP from Google Play or the APP Store.

Brushless solution for advanced installations for industrial use

- Designed to deliver high performance and manufactured using innovative materials, it guarantees excellent durability with an MCBF of 250,000 cycles.
- "Adaptive Speed and Torque Technology" to ensure a lasting, constant and smooth speed during movement.
- Control board with terminal blocks, graphic display and storage for up to 1000 users.
- Four safety inputs which can be configured to directly manage the (8k2Ω) resistive sensitive safety-edges.
- User-friendly release lever for manually opening the gate.
- Integrated clock card for management of up to 8 opening and closing operations programs.
- Protection rating against weathering agents (IP54).
- Ready for installation of magnetic limit switches (001RSDN002).
- Developed with CONNECT technology for remote digital control via gateway or locally via CAME KEY.
- Compliant with Regulation (EU) 2023/826, for energy consumption in off, stand-by and network stand-by modes.

Complete automations with 24 V DC brushless operator

801MS-0690

BKX08AGF - Automation with 24 V Brushless motor with speed up to 24 m/min, Adaptive Speed & Torque Technology, equipped with control board with graphic display, CAME Key ready, CXN BUS, B1 and B2 output, on-board radio decoding, movement management and obstacle detection for gates up to 800 kg and 20 m length. RAL7024-gray cover.

801MS-0700

BKX12AGM - Automation with 24 V Brushless motor, Adaptive Speed & torque Technology, complete with electronic board with graphic display, CAME Key ready, CXN BUS, second radio channel output B1 and B2, magnetic limit switch, built-in radio decoding, motion management and obstacle detection for gates up to 1200 kg and 20 m in length. Grey cover RAL7024.

Complete operators with 36 V DC gearmotor - REVERSIBLE Version

801MS-0520

BKV15AGR - High performance operator with 36 V reversible motor, featuring a control board with graphic display, Adaptive Speed & Torque Technology, 4 safety inputs, movement and obstruction detecting device for gates weighing up to 1500 kg that are up to 20-m long. RAL 7040 grey cover.

SMOOTH MOVEMENT AND SWIFTNESS IN ANY CONDITIONS

The new BKV series is designed to meet the highest standards in terms of performance at any latitude and in any climate. BKV motors feature state-of-the-art ADAPTIVE TORQUE AND SPEED TECHNOLOGY (AST), that is, an integrated obstruction-detection software that, moment by moment, handles the current absorbed by the geared motor, to ensure the movement is super smooth, while keeping the speed constant according the installation parameters.

SWING GATES UNDERGROUND OPERATOR

It is practically invisible and does not change the gate's aesthetics.
It does not limit the net clearance width.

CAME 

SWING GATES SURFACE OPERATOR

Simple installation with no setting up.
It is by far the most popular among swing gates.

SWING GATES HINGED-ARM GEARMOTORS

When the traditional surface-fitted gearmotor cannot be installed due to space limitations, the folding drive arm solves the issue.

MAXIMUM C-DISTANCE ON SWING GATES

That is the centre-distance between the inner corner of the post and the gate's rotating axis.
The limits to this measurement allow you to pick the most suitable operator for any gate.

Notes

In swing gates, the installation of an electric lock is always recommended to ensure reliable closure of the gates and to protect the gears of the geared motors.

- In the case of irreversible geared motors, it is always recommended, but becomes mandatory with leaves longer than 2.5 m.
- With reversible geared motors, it is necessary to ensure that the sash closes. In the latter case, it is still up to the installer to decide whether to install it, taking into account the size and type of sash (e.g. panelled) and the installation area (e.g. a windy area).

THE FLASHING LIGHT FOR SIGNALLING MOVEMENT.

CAME has always suggested installing the flashing light as an additional safety feature for the automation system.
The KRX range, with LED technology, combines energy saving and great reliability with easy installation.
KRX can be integrated with all CAME radio systems, is available in various colors, has a built-in radio antenna and each model can be powered from 24 V DC to 230 V AC.

Energy-saving accessory for 24 V DC control panels

806XG-0160

Green Power Module - The Green Power module is an innovative accessory that allows you to reduce the energy consumption of your automation during stand-by periods.

Accessories for: 801MP-0090 - 801MP-0100 - 801MP-0110

001H3000

Case for remote release with customized key, plus pull-cord handle and control button. Cord length L = 5 m.

Accessories for: 002ZL65 - 801QA-0050 - 801QA-0060

002RLB

Circuit board for emergency operation and battery charging.

CXN BUS interface for: 801QA-0050 - 801QA-0060 - 801QA-0120 - 801QA-0130

806XG-0080

BUS expansion module with 2 inputs and 2 outputs. Inputs can be configured in NO, NC or resistive mode (8K2), a warning light output and a relay output.

BUS accessory management module for: 801QA-0110

806XG-0110

RCXN - Module for managing CXN BUS accessories.

Accessories

001LOCK81

Single cylinder electric lock.

001LOCK82

Double cylinder electric lock.

C MAX. DIMENSION UP TO 200 mm

ATS is the universal solution, ideal for both small or large residential settings.

It is a very versatile operator and thanks to the telescopic extension it is able to adapt perfectly to posts of different depths.

EASY MANUAL RELEASE

In case of need it is possible to unlock the motor to open or close the gate leaf manually.

A single gesture is sufficient to unlock ATS. The pin to be operated is protected by a flap that simply opens with a finger.

The new tri-lobed key also has a completely new design, for greater ergonomics.

Green Power Module - The Green Power module is an innovative accessory that allows you to reduce the energy consumption of your automation during stand-by periods.

Accessories for: 801QA-0050 - 801QA-0060

002RLB

Circuit board for emergency operation and battery charging.

CXN BUS interface for: 801QA-0050 - 801QA-0060 - 801QA-0120 - 801QA-0130

806XG-0080

BUS expansion module with 2 inputs and 2 outputs. Inputs can be configured in NO, NC or resistive mode (8K2), a warning light output and a relay output.

Accessories

001LOCK81

Single cylinder electric lock.

001LOCK82

Double cylinder electric lock.

001D001

Lock cylinder with DIN key.

Advanced Brushless solution for residential or apartment buildings applications

- Invisible and fast Brushless solution for gate automation.
- Board equipped with CXN BUS connectors.
- Protection rating against weathering agents IP67.
- Foundation box in steel with anticorrosive treatment, or in AISI 304 stainless steel.
- Designed to perfectly replace old FROG installations.
- Integrated, adjustable mechanical limit switches.
- Opening up to 180° (with 801XA-0040 accessory).
- Set up for operation in case of power outage.
- Developed with CONNECT technology for remote digital control via gateway or locally via CAME KEY.
- Compliant with Regulation (EU) 2023/826, for energy consumption in off, stand-by and network stand-by modes.

Underground 24 V DC operators

801MI-0030

FRG40DGX - Irreversible 24 V brushless underground operator with native encoder, Adaptive Speed & Torque Technology, motion management, obstacle detection and adjustable closing leaf stop for swing gates with leaves up to 4 m and 400 kg weight. FROG-X is driven by the dedicated control panel 801QA-0170.

Control panels for 24 V gearmotors

801QA-0170

ZLB24SA - Multifunction control panel, with 230 V AC power supply, for 24 V FROG-X brushless operator, with graphic display for programming and signaling, self-diagnosis of safety devices, Adaptive Speed & Torque Technology, CXN BUS, 4 safety inputs and storage for up to 1000 users. The control panel is specifically designed for FROG-X, and cannot be used on other swing motors.

24 V accessories for control panels

801XC-0250

LBNX - Circuit board for blackout operation, battery charging, and energy saving in standby mode.

Energy saving accessory for: 801QA-0170

806XG-0160

Green Power Module - The Green Power module is an innovative accessory that allows you to reduce the energy consumption of your automation during stand-by periods.

CXN BUS interface for control panels

806XG-0080

BUS expansion module with 2 inputs and 2 outputs. Inputs can be configured in NO, NC or resistive mode (8K2), a warning light output and a relay output.

Accessories

001FROG-CFNI

AISI 304 steel foundation box, complete with release latching-lever, gate fastening brace, slots for fastening to post, and screw for adjusting the opening limit-switch point.

001FROG-CFN

Steel foundation box with cataphoresis treatment, featuring release transmission, gate fastening brace, slots for fastening to post, and spring for adjusting the opening limit-switch point.

ADAPTIVE SPEED AND TORQUE TECHNOLOGY

Adaptive Speed and Torque Technology (AST) is the advanced firmware feature that dynamically optimizes speed and torque, adjusting motor thrust based on gate feedback to ensure smooth and consistent movement. During installation, parameters such as the sensitivity of the AST are set. Firmware continuously monitors gate operation and adjusts torque with each cycle, ensuring accurate and reliable performance.

Control panels for 24 V DC gearmotors tested in conformity with standards EN 12453

801QA-0050 ZLX24MA - Multifunctional control panel, with 230 V AC power supply, for 24 V double-leaf gates, with programming and signaling display, self-diagnosis of safety devices, Adaptive Speed & Torque Technology, CXN BUS, 2 safety inputs and storage for up to 250 users.

801QA-0060 ZLX24SA - Multifunctional control panel, with 230 V AC power supply, for 24 V double-leaf gates, with programming and graphical signaling display, self-diagnosis of safety devices, Adaptive Speed & Torque Technology, CXN BUS, 4 safety inputs and storage for up to 1000 users.

Energy-saving accessory for 24 V DC control panels

806XG-0160 Green Power Module - The Green Power module is an innovative accessory that allows you to reduce the energy consumption of your automation during stand-by periods.

Control boards

001AF43S 433,92 MHz plug-in radio frequency card.

001AF868 868,35 MHz plug-in radio frequency card.

806SS-0040 RIOCN8WS - Snap-in, radio-based control module for managing wireless accessories.

002RSE Interface card for controlling two operators or for enabling the Came Remote Protocol.

Wi-Fi gateway and Bluetooth switch

806SA-0140 WIFI GATEWAY- Gateway to connect the automation to the cloud via Wi-Fi or locally via Bluetooth selector (50 users)

Accessory for local programming

806SA-0110 CAME KEY - Smart interface for local setting of automation via App.

Accessory for integration with third-party systems for: 801QA-0050

803XC-0020 Modbus TCP/RTU bridge for integration with third party systems.

CXN BUS interface for automations

806XG-0080 BUS expansion module with 2 inputs and 2 outputs. Inputs can be configured in NO, NC or resistive mode (8K2), a warning light output and a relay output.

ZLX230

CONTROL PANELS

ZLX230 is the universal control panel for 230 V motors for swing gates

- Digital Torque Control (DTC).
- CNX BUS inputs (optional on ZLX230P).
- Slot for CAME KEY and Wi-Fi Gateway.
- Outputs B1-B2 (ZLX230S only).
- 250 users (ZLX230M and ZLX230P) or 1000 users (ZLX230S).
- Adaptive auto-closing time.
- Encoder management (ZLX230M and ZLX230S).
- 4 configurable safety inputs (2 on ZLX230M and ZLX230P).
- RIO System 2.0.
- Integrated clock (ZLX230S only).
- Compliant with Regulation (EU) 2023/826, for energy consumption in off, stand-by and network stand-by modes.

COUNTER-BALANCED OVERHEAD OR SPRING LOADED PARTIALLY RETRACTING DOOR

This type of door features a counter-weighted or spring-loaded balancing system. When opening and closing the door retracts into the garage by two-thirds of its surface area.

CAME 

PROTRUDING OVERHEAD GARAGE DOOR PARTIALLY RETRACTING DOOR (WITH TWO GEARMOTORS ON THE DOOR)

This type of door features a counter-weighted or spring-loaded balancing system. When opening and closing the door retracts into the garage by two-thirds of its surface area. The double gearmotor is fitted with insulated and/or pedestrian doors.

COUNTER-BALANCED OVERHEAD OR SPRING LOADED

This type of door is powered via traction system. Depending on the type of door, you will need to choose the right type of chain or belt as well as the right type of adapter arm for counter-weighted, protruding, partially-retracting overhead garage doors.

NON-PROTRUDING, TOTALLY RETRACTING, OVERHEAD GARAGE DOOR (WITH GEARMOTOR FITTED TO DOOR)

This type of door is balanced by counter-weights. When opening, the door fully retracts into the garage.

SECTIONAL DOOR

This type of door is spring-loaded for balance. It is made up of hinged, horizontal panels.

KLT FOR GARAGE DOORS

KLT is the perfect solution for any setting where the application of a slim flashing light with essential lines is required. Installed on a wall or post, KLT is a safety indicator in case of moving automations for garage doors, industrial doors or gates.

SINGLE BARRIERS FOR SINGLE HOMES

CAME barriers can be used to control small apartment building parking facilities.

CAME 

HEAVY-DUTY SINGLE OR DOUBLE BARRIERS

You can manage heavily trafficked parking facilities such as at company parking lots, auto dealerships or even private parking areas.

PARKING-FACILITY BARRIERS

The simple, practical solution for controlling transit flows in pay-to-park areas.

BARRIERS FOR VERY WIDE CLEARANCES

CAME barriers are used even for passages where special or oversized vehicles transit.

FOR SINGLE PARKING SPACES

Ideal for apartment-building parking facilities or for authorized staff parking.

FOR MULTIPLE PARKING SPACES

Ideal for small apartment-blocks or when a low-profile barrier is required.

NOTE:

* The boom must be stabilized at 60° opening during the balancing procedure.

SINGLE SPRING BALANCING

CAME's R&D department has developed a practical variable balancing system, which allows using a single spring that can be connected to the balancing lever at different predefined points. It is therefore no longer necessary to have specific springs for the different boom lengths, but it is sufficient to operate on the hooking system.

SIMPLE CONFIGURATION

The control board is positioned directly under the cabinet cover.
All the configuration and maintenance phases can therefore be carried out comfortably standing upright, with the cabinet closed, in complete safety.

FULL-HEIGHT FOLDING SKIRT

Suitable for both residential and industrial use, the folding skirt is the ideal solution to prevent access by pedestrians or unauthorized vehicles. GARD GT4 can be equipped not only with a lower skirt, but also with a special full-height solution that can be fully folded to close the gate to a height of 130 cm. This accessory is made of aluminum with white/red painted strips.

DOUBLE SPRING BALANCING

The CAME R&D department has developed a practical variable balancing system, which allows using two springs connected to the balancing lever at different predefined points. It is therefore no longer necessary to have specific springs for the different boom lengths, but it is sufficient to operate on the hooking system.

SIMPLE CONFIGURATION

The control board is positioned directly under the cabinet cover. All the configuration and maintenance phases can therefore be carried out comfortably standing upright, with the cabinet closed, in complete safety.

RG LED

The LED strip system can be installed on both sides of the boom and regulates access through the traffic light function, which indicates the boom position with a green or red light.

Specific solution for special applications

- Two 24 V DC gearmotors installed on the same axis to offer greater drive torque.
- Balancing with modular counterweights, it guarantees a safe and reliable movement of the boom.
- Sturdy structure with galvanized steel cabinet with rough finish.
- Easy access to the wiring, thanks to the control panel positioned in the upper part of the cabinet.
- Manual release operated with a practical handle, does not require additional tools.

CAME 

SLIDING DOOR

This operator is widely used in industrial facilities.

FOLDING DOOR

This operator is used to close very wide entrances while limiting, as much as possible, the space taken up laterally when the door is open.

THE FLASHING LIGHT FOR MOVEMENT SIGNALING.

CAME has always suggested installing the flashing light as an additional safety feature for the automation system. The KRX range, with LED technology, combines energy saving and great reliability with easy installation. KRX can be integrated with all CAME radio systems, is available in various colors, has a built-in radio antenna and each model can be powered from 24 V DC to 230 V AC.

INDUSTRIAL DOOR AUTOMATION

MAX. LEAF LENGTH	MAX. LEAF WEIGHT	USE
UP TO 2 m	UP TO 300 kg	INTENSIVE DUTY

Ideal solution for fitting on swing-leaf and folding doors for industrial use

- 24 V DC and 230 V AC EN tested versions thanks to the electronic management with encoder.
- Quick and simple installation.
- It can be installed either on the right or left thanks the symmetrical inputs on the gear shaft.
- Protection rating against weathering agents (IP54).
- In the 24 V DC versions it is possible to adjust the maneuvering speed, opening and closing slow-down speeds, and electronic detection of the obstacle.
- Developed with CONNECT technology for remote digital control via gateway or locally via CAME KEY.
- Compliant with Regulation (EU) 2023/826, for energy consumption in off, stand-by and network stand-by modes.

Multifunction control panel for two-leaved doors, complete with safety lock and buttons, with graphic programming display and signalling, plus self-diagnosing safety devices.

24 V DC gearmotors, tested to be compliant with regulatory standards EN 12453

001F4024E

Irreversible gearmotor with encoder.

001F4024EP

Irreversible gearmotor with encoder – boosted version.

Control panels for 24 V gearmotors, tested to be compliant with regulatory standards EN 12453

801QA-0050

ZLX24MA - Multifunctional control panel, with 230 V AC power supply, for 24 V double-leaf gates, with programming and signaling display, self-diagnosis of safety devices, Adaptive Speed & Torque Technology, CXN BUS, 2 safety inputs and storage for up to 250 users.

801QA-0060

ZLX24SA - Multifunctional control panel, with 230 V AC power supply, for 24 V double-leaf gates, with programming and graphical signaling display, self-diagnosis of safety devices, Adaptive Speed & Torque Technology, CXN BUS, 4 safety inputs and storage for up to 1000 users.

Accessories for: 801QA-0050 - 801QA-0060

002RLB

Circuit board for emergency operation and battery charging.

Energy-saving accessory for 24 V DC control panels

806XG-0160

Green Power Module - The Green Power module is an innovative accessory that allows you to reduce the energy consumption of your automation during stand-by periods.

Accessories

001F4004

Sliding drive-arm with track.

001CMS

Release handle with customized key and resetting pull-cord L = 7 m.

001C002

Hanging release system.

CXN BUS interface for: 801QA-0050 - 801QA-0060 - 801QA-0120 - 801QA-0130

806XG-0080

BUS expansion module with 2 inputs and 2 outputs. Inputs can be configured in NO, NC or resistive mode (8K2), a warning light output and a relay output.

INDUSTRIAL DOOR AUTOMATION

MAX. LEAF HEIGHT	SHAFT Ø	USE
UP TO 11 m	25.4 mm (1")	20 CYCLES/HOUR

Ideal solution for sectional, sliding or folding door applications for industrial use

- C-BXK offers more torque for moving very heavy doors at 230 V AC.
- It can open manually by using the handy winch device.
- Possibility of horizontal and vertical installation for greater versatility.
- 230 - 400 V AC three-phase version, equipped with encoder, to guarantee greater thrust and maximum safety.

KLT FOR GARAGE DOORS

KLT is the perfect solution for any setting where the application of a slim flashing light with essential lines is required.
Installed on a wall or post, KLT is a safety indicator in case of moving automations for garage doors, industrial doors or gates.

THE SAFETY

GENERAL CHARACTERISTICS

PHOTOCELLS: SYNCHRONIZED INFRARED BEAM

Thanks to the synchronized beam, multiple pairs of photocells can be applied to the same system, even at double height and/or close to each other - with no interference issues.

FLASHING LIGHTS: LOW CONSUMPTION MOVEMENT DETECTORS

Lightweight, practical and quick to install, the beacons are equipped with a low consumption LED lamp.

Available in 24 V AC - DC and 120 - 230 V AC versions, they are equipped with accessories for wall mounting and integrated antenna (KRX and KLT).

SENSITIVE SAFETY EDGES: CUSTOMIZABLE AND READY TO INSTALL

Equipped with a resistive contact and certified in accordance with EN13849-1 standards, they are used to create automation systems with high safety standard.

WIRED AND REMOTE CONTROLS: SAFETY AND VERSATILITY

When installed with sensitive edges, they control the protections installed on both the moving leaf gate and the fixed part, with a high level of safety in full compliance with current regulations.

THE PHOTOCELLS WITH ALUMINIUM COVER

The DXR series of swivel photocells can also be used to control a system thanks to the adjustable relay output. Special aluminium covers are also available, specific for applications where maximum strength and reliability are required.

GENERAL CHARACTERISTICS

SELF-LEARNING OF THE CODE FROM TRANSMITTER TO RECEIVER

This function lets the dedicated receiver memorize the code assigned to the transmitter.

SELF-LEARNING OF THE CODE FROM TRANSMITTER TO TRANSMITTER

This characteristic lets you create a duplicate transmitter, by copying the code onto another identical device.

MULTI-USER CODES

This characteristic on the transmitter is for emitting different codes for each key on the transmitter itself.

The aim is to obtain control of independent systems that are located within the same operating range.
(E.g.: common gate used by all tenants and private overhead garage door for each tenant).

RADIO SYSTEM CERTIFICATION

All CAME radio-frequency systems are certified for using in European and non-European countries.

MADE IN ITALY, MADE BY CAME!

The 100% Made-in-Italy brand of origin certifies that all CAME products come from a quality manufacturing process, designed to provide reliable and effective technological products. The products have been tested for 10 to 15 years of wear and tear under intense activity, with extreme temperature resistance tests and specific checks on operating in electromagnetic interference conditions.

RIO System 2.0

WIRELESS SECURITY SYSTEM

RIO SYSTEM 2.0, COMPLETELY SAFE, NO WIRES

RIO System 2.0 is the innovative radio-based safety system that needs no wired connection between the control module and the safety accessories. This feature drastically reduces installation times. Control module, photocells, sensitive safety-edge and flashing light all make up a complete system based on totally wireless transceiver-technology. This is ideal for bringing up to code any existing systems or for rapidly installing entirely new systems. The control module is to be connected to the operator's control panel, whereas the other modules interact via radio.

RIO System 2.0 is incompatible with the previous version.

SYSTEM COMPONENTS AND MAIN CHARACTERISTICS

806SS-0050

- Radio control module, with 30 m range, which can manage up to 6 Rio series wireless accessories that are programmed during installation.
- LED for monitoring the system and devices' operation.
- Buzzer for flat-battery or wireless accessory malfunction alerts.
- Automatic frequency switching when radio-frequency disturbances occur.
- Special function for viewing radio-signal quality and any disturbances.

806SS-0030

- Wireless, battery-operated flashing light.
- Two high-luminosity LEDs to provide 360° alerts when the operator is moving.
- LED for monitoring the system and devices' operation.

806SS-0020

- Certified product, validated for category 2, which means it is highly safe and reliable.
- Wireless module for controlling one or two resistive sensitive safety-edges of the 8k2 DFWN series, that can transmit and receive from and to Rio control.
- Battery powered.
- LED for monitoring the system and devices' operation.
- Buzzer for flat-battery alerts or poor radio communication.

806SS-0010

- Pair of battery-powered wireless photocells that can transmit and receive to and from the 806SS-0040 and 806SS-0050 modules.
- Infrared signal (range 10 m).
- LED for monitoring the system and devices' operation.
- Buzzer for flat-battery alerts or poor radio communication.

806SS-0040

- Snap-in radio control module for controlling wireless accessories to use in corresponding automated operators.

GATEWAY

CONNECT GATEWAYS

Gateways for automation, access control and smart home

- Developed with CONNECT technology for remote digital control via gateway or locally via CAME KEY.
- Installation freedom by choosing the appropriate type of connection (4G - Wi-Fi - Ethernet).
- Thanks to the CAME protocol it is possible to have total control of the operator (commands, automation status, programming).
- Possibility to program scenarios and timers, easily and intuitively.
- System extension with slave modules and interaction between different devices, including those that can be controlled via apps or voice commands (e.g., Alexa).
- Thanks to two output relays and two digital inputs, integrated in the unit, the operator opening or closing can be controlled without the CAME protocol (806SA-0010 - 806SA-0020).
- Smartphone access automation, secure personal data management, and remote code control for keypads or common areas.
- "CAME AUTOMATION," "CAME SETUP" and "QBE" apps for users and installers, available on Google Play and App Store.

Accessories for keypad operation

806SL-0280 SELT1BDG - Surface-mounted 12-key CXN BUS keypad selector with blue backlighting. RAL7024 gray color.

806SL-0290 SELT2BDG - Recess-mounted 12-key CXN BUS keypad selector with blue backlighting. RAL7024 gray color.

Accessories for operation with Manchester transponders

806SL-0300 SELR1BDG - Surface-mounted CXN BUS transponder selector for cards, keyfobs and TAG (Manchester protocol) with blue backlighting. RAL7024 gray color.

806SL-0310 SELR2BDG - Recess-mounted CXN BUS transponder selector for cards, keyfobs and TAG (Manchester protocol) with blue backlighting. RAL7024 gray color.

009PCT Keyfob transponder.

806XG-0090 Transponder card, ISO 7810 - 7813 format, Manchester 125 KHz protocol.

Accessories for operation with MIFARE transponders

806SL-0320 SELM1BDG - Surface-mounted BUS transponder selector for MIFARE cards with blue backlighting. RAL7024, gray color.

806SL-0330 SELM2BDG - Recess-mounted BUS transponder selector for MIFARE cards with blue backlighting. RAL7024, gray color.

806XG-0100 ISO MIFARE Classic 1 K – 13.56 MHz card.

Video entry system kit

8K40AD-004 MTMAKCONNECT - Entry system kit with MTMA/Connect module equipped with a call button. Connected to CAME automations, it acts as a 4G gateway, enabling connection to the CAME Connect cloud. Complete with accessories in anti-vandal version and black painted aluminum support post.

DOWNLOAD THE CAME AUTOMATION APP

The Cloud connection changes the way we experience our automated operators, by ensuring comfort and safety.

We have put all our CAME Connect automated products online. In this way they can be controlled from any smartphone or tablet.

THE POTENTIAL OF QUICK&EASY ACCESS WITH RBE PLUS

The RBE Plus connection can be configured in various modes, depending on the distance between the control unit and the home router. For short distances, the CAME 806SA-0200 gateway, plugged directly into the RBE Plus control unit, allows the connected automations to be controlled within the range of the Wi-Fi signal. For longer distances, CAME QBE AC or a GSM gateway connected to the telephone network must be used.

INFINITE APPLICATIONS

Using the CAME CONNECT cloud, you can manage endless RBE Plus and MTA/CONNECT systems.

All the devices talk to each other without the need for a wired connection.

QUICK&EASY ACCESS WITH MTMA/CONNECT

NATIVE INTEGRATION AND SCALABILITY

RBE Plus and MTMA/CONNECT are designed to integrate with the Quick&Easy Access system-the ideal solution for B&Bs, hotels, logistics facilities and much more. The synergy between these modules enables the automated management of unique codes for each guest and allows direct contact with the customer via the audio entry system.

GUEST MANAGEMENT AND AUTOMATION

Credentials, which are only valid during the check-in/check-out period, are automatically sent via e-mail. The guest can access the enabled gates by typing the code on the keypad or by logging in from a smartphone, without the need to install any App.

CONTROL AND MONITORING

The same code is used to log in via smartphone, without the need to install any APP, or locally using the keypads installed on the gates.

The owner/management can constantly monitor the event log, verify guest access and the access gate used.

BENEFITS FOR THE OPERATOR

- With MTMA/CONNECT you can answer the audio entry system directly from your smartphone, without the need for any App.
- Remote control, easy and convenient from any place and any device
- Ensure guests have 24-hour access to the facility every day
- Secure access to the facilities
- Remote backup
- Check-in and Check-out management
- Customized invitation email with logo.
- Customized confirmation email in various languages, selectable by the host
- Automated system for access via smartphone
- Personal use of the Automation APP for gate management
- Automatic generation of access codes for use on installed keypads
- A single access code to be assigned to the customer for all authorized access

BENEFITS FOR THE GUEST

- Clear confirmations in several languages
- No procedure required to register
- No APP installation but web browser
- Hassle-free reservations
- Single access code for all entrances to the facility
- Unlimited access at any time during the reserved stay
- Secure management of personal data
- With MTMA/CONNECT you can contact the operator from the audio entry system at any time.
